

Ipendo Platform™ Tech Info

The Ipendo Platform™ is completely web-based. Customers simply need a browser to utilize all features of the Ipendo Platform™. Ipendo is continuously testing new browsers and versions, but currently the Ipendo Platform™ works best with Internet Explorer 7.0/8.0.

Ipendo customers can choose between a SaaS (Software as a Service) solution and an In-house solution.

SaaS Solution

The Ipendo Platform™ will be hosted and maintained by Ipendo, including lines, security and backups. Ipendo offers flexible options regarding dedicated servers and multi-location failover.

Ipendo's hosting services are located at Ipendo's hosting partner with SAS 70 Level II certification for uptime standards and security.

In-house Solution

Ipendo Platform™ will be hosted and maintained by the customer.
