**Ipendo**

**Get more mutually rewarding business opportunities  
with the revolutionary Ipendo Extranet™**

*Enjoy closer attorney-client collaboration with the world's most advanced IP portfolio access*

# Sharpen Up Your Competitive Edge With The 21st Century IP Solution

Today's corporate clients demand better ways to exploit their IP portfolios. They also want you to offer ever more sophisticated ways to help them achieve this.

**IPENDO EXTRANET™** is the answer – a revolutionary, technically advanced but easy to operate, modern management solution.

Ipendo Extranet™ is an IP communications platform with instant portfolio access in any format. Information is published automatically giving you added value opportunities to share and utilize information hidden in your internal databases with real-time availability. Ipendo replaces the potential chaos of misplaced emails with a structured approach to IP communications that puts everyone in complete control.

Working alongside your own internal docketing system, Ipendo Extranet™ streamlines communication and improves client collaboration with its unique range of 100% IP focused tools.

## **Advanced Simplicity**

As an off-the-shelf product with sophisticated technology, Ipendo Extranet™ easily integrates with all of your (and your client's) existing systems. Both of you can access the same

privileged information with our user-friendly interface that gives total transparency and an unparalleled overview.

The innovative Ipendo IP Forecaster tool gives you access to powerful, crucial business information in a clear, graphical format for an unrivalled holistic overview. You can follow up on accrued costs, create limitless budget scenarios, simulate future filings, plan country strategies and much more. Our integration team can also help you incorporate this effective tool into your systems to ensure automatic data transfer.

## **Fast - Effective - Foolproof**

Ipendo Invention Submission simplifies submitting new inventions. Inventors can follow the review process and receive all updates as required. Data and attachments can be converted into a record or IP case with one click (saving valuable time and reducing errors). Ipendo Invention Disclosure also enables inventors to submit disclosures directly to attorneys to ensure early involvement in your client's internal processes.

“Ipendo Extranet™ is a simple and efficient way of communicating with clients. By sharing the same information, both the attorney and the client are able to focus on the core in IP without any delay. I believe this is the future within IP.”

*Eric Furman, Partner at Knobbe Martens Olson and Bear LLP*

Day-to-day operation is effortless. At the touch of a button you can:

- Make advanced client portfolio searches
- Administer EP validations
- Order patent annuities
- Place an action directly into the system
- Manage your client's entire IP portfolio

### Cost Effective From Day One

Why spend time and money developing, supporting and maintaining your own Client Web? Ipendo Extranet™ is a proven product used by thousands of IP legal professionals and clients the world over.

Expensive mistakes become a thing of the past. The status of patents and other IP

rights are clear for everyone to see in the tree structure your clients are familiar with on our trusted internet-based IP management software.

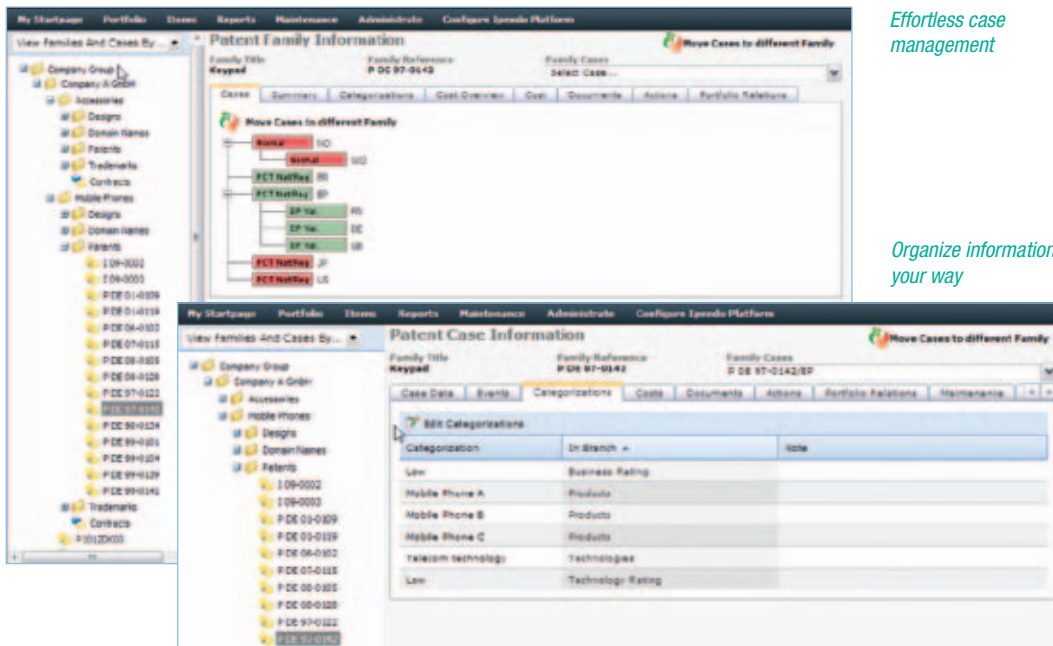

### Powerful and flexible

Ipendo Extranet™ allows you to customize modules for any requirement. Choose only the modules that best suit your business needs. Whether you call for a basic structure or an advanced setup, your personal Ipendo Project Manager will customize a system to your precise requirements.

**Offer Ipendo Extranet™ to your clients today and gain an immediate, razor sharp competitive advantage.**
